

AMERICAN DND

American Demolition & Nuclear Decommissioning

provides services related to the decommissioning and demolition of a facility. There are many phases to a demolition project and American DND personnel have accomplished all aspects and different stages of the decommissioning process. American DND personnel can either assist/augment an existing staff through the decommissioning phases, or American DND can actually perform contract for those services if requested.

The 6 P's Principal:
**Prior Proper Planning
Prevents Poor Performance**

Managing Change

American DND Personnel are experienced professionals at Change Management. Change begins when the decision to decommission a facility is first made and ends when that facility is returned to the original "GREEN" habitat before it was built. ADND's previous project experience allows us to TEAM with a Client and work through the myriad of changing, evolving and emerging issues encountered during the decommissioning process.

Planning

- Transition Planning from Operating Plant to Decommissioning Process
- Waste Optimization/Minimization Plans
 - Non-Radiological Hazardous & Non-Hazardous Waste
 - Radiological Waste
- Contractor Selection Process
- RFP and Demolition Specification Development

Working

- ISM & Safety Incentive Plans
- Labor Relations Management
- De-Construction Management Operations
- Demolition Engineering/Structural Analysis
- Field Observations and Inspections
- QA/QC Surveillance Audits and Assessments
- Demo Equipment Management

**It's no accident your project is performed safely when you hire American DND.
Experience where it matters most: planning, design, execution!**
